

Introducing to the LORD Consulting Team..

Keith Gilby

SENIOR AFFILIATE

Summary of competencies

A Chartered Engineer with 27 years experience in the Power industry within New Zealand and the UK. Keith has held senior executive roles within the New Zealand Power Industry since 2008, championing the Asset Management Frameworks approach with a key focus on *People, Process and Performance* improvement strategies. Keith specialises in the application and implementation of strategic asset management frameworks, strategic management, change management and project implementation.

Major achievements include the development and implementation of major change management and performance improvement programmes targeting the strategic engagement of internal and outsourced contract workforce, from operational to senior management levels, to develop company cultures which promote the principle of *People, Process Improvement and Performance*. This has included addressing key issues in safety, quality, environmental and risk management to install a holistic asset management culture of peak performance and continual improvement. Also, the implementation of a PAS55 framework improvement programme, the development of a comprehensive Network Strategic Plan and targeted community, stakeholder and regulator engagement strategies. Keith has also successfully managed the delivery of the first major asset transfer of 110kV Grid Assets between Transpower and a lines company.

Keith has also provided specialised consultancy services at executive, strategic and operational management level to companies in New Zealand, Australia and central Africa and is an active member of the Electricity Engineers Association of New Zealand at senior level and leads specialist projects within the EEA Asset Management Working Group.

Recent project experience

- PAS55 Asset Management Review and Strategic Improvement Programme – 2 Companies
- SAP PM Implementation and Change Management Project – 2 Companies
- Reviewed and Implemented progressive performance improvement plans for Network Control, Operations, Maintenance and Project Management functions
